Corps launches E-newsletter to address topics on the Savannah River basin

"Balancing the Basin" reaches out to upstream and downstream stakeholders

SAVANNAH, GEORGIA – The [U.S. Army Corps of Engineers' Savannah District](#) continues to launch a newsletter—distributed via e-mail—that highlights issues and events related to the Savannah River Basin. Through the newsletter the District seeks to foster communication with stakeholders in the Savannah River Basin concerning management of water resources, recreation opportunities, environmental concerns and related issues.

The Corps began initial distribution Jan. 31 of the newsletter "[Balancing the Basin](#)" to more than 500 recipients. These included lake community and business groups, federal and state natural resource agencies, congressional staff, news media, environmental organizations, and individuals who have expressed interest in the Savannah River basin. The newsletter will publish quarterly.

The e-newsletter gives "teasers" on various subjects, which in turn lead viewers to more information posted on the district's web sites. It can be viewed from the district's homepage at www.sas.usace.army.mil/, under "District Publications." Those interested in subscribing can do so by sending an e-mail to CESAS-CCO@usace.army.mil.

– 30 –

The U.S. Army Corps of Engineers' [Savannah District](#) manages [three lakes and hydroelectric dams](#) along the Savannah River. It also oversees a multi-billion dollar [military construction](#) program at 12 Army and Air Force installations in Georgia and North Carolina. Corps' projects range from barracks, hospitals and clinics to equipment shops, headquarters buildings and aircraft hangars. The Savannah District also has oversight and maintains additional civil works projects – from the Savannah and Brunswick harbors to the Atlantic Intracoastal Waterway.
