JANUARY 25 2012

Regulatory Division
SAS-2011-01034

JOINT PUBLIC NOTICE
Savannah District/State of Georgia

The Savannah District has received an application for a Department of the Army Permit, pursuant to Section 404 of the Clean Water Act (33 U.S.C. 1344), as follows:

Application Number: SAS-2011-01034

Applicant: Pilgrim's Pride

Attention: Mr. Michael Bostick, Mill Manager
1025 Ambrose Road
Ambrose, Georgia 31512

Agent: Wetland and Ecological Consultants, Inc.

Attention: Mr. John Vermont
3225 South Cherokee Land, Building 800
Woodstock, Georgia 30188

Location of Proposed Work: The existing Pilgrim's Pride mill site is located on Ambrose Road, 2.0 miles southeast of Ambrose, Coffee County, Georgia (Latitude 31.5707, Longitude -82.9825).

Description of Work Subject to the Jurisdiction of the US Army Corps of Engineers (USACE): The applicant proposes to construct a 1 mile rail spur loop by extending an existing spur/siding around the Pilgrim's Pride feed mill. The applicants stated purpose for the project is to improve the capacity, efficiency, and safety of operation for the rail spur and siding for the mill. This proposed work would require three jurisdictional crossings, with wetland impacts of 0.26, 0.25 and 1.28 acres, respectively. To mitigate for the proposed impacts, the applicant proposes to purchase 11.81 mitigation credits from Hog Creek Mitigation Bank, Musket Bay Mitigation Bank, Satilla Mitigation Bank, or Offerman Mitigation Bank. All of which are USACE approved mitigation banks which include the project area within their primary service area.

BACKGROUND

This Joint Public Notice announces a request for authorizations from both the US Army Corps of Engineers and the State of Georgia. The applicant's proposed work may also require local governmental approval.

STATE OF GEORGIA

Water Quality Certification: The Georgia Department of Natural Resources, Environmental Protection Division, intends to certify this project at the end of 30 days in accordance with the provisions of Section 401 of the Clean Water Act, which is required for a Federal Permit to conduct activity in, on, or adjacent to the waters of the State of Georgia. Copies of the application and supporting documents relative to a specific application will be available for review and copying at the office of the Georgia Department of Natural Resources, Environmental Protection Division, Water Protection Branch, 4220 International Parkway, Suite 101, Atlanta, Georgia 30354, during regular office hours. A copier machine is available for public use at a charge of 25 cents per page. Any person who desires to comment, object, or request a public hearing relative to State Water Quality Certification must do so within 30 days of the State's receipt of application in writing and state the reasons or basis of objections or request for a hearing. The application can be reviewed in the Savannah District, US Army Corps of Engineers, Regulatory Division, 1104 North Westover Boulevard, Unit 9 Albany, Georgia 31707.

US ARMY CORPS OF ENGINEERS

The Savannah District must consider the purpose and the impacts of the applicant's proposed work, prior to a decision on issuance of a Department of the Army Permit.

Cultural Resources Assessment: As part of their application package, the applicant provided a report titled, "Phase I Cultural Resources Survey, Proposed Pilgrims Rail Loop Corridor, Coffee County, Georgia", dated December 14, 2011. The report will be reviewed by the USACE and coordinated with the Georgia Department of Natural Resources, Historic Preservation Division prior to a decision being made on the permit request.

Endangered Species: Pursuant to Section 7(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 et seq.), we request information from the US Department of the Interior, Fish and Wildlife Service, the US Department of Commerce, the National Oceanic and Atmospheric Administration, and the National Marine Fisheries Service; or, any other interested party, on whether any species listed or proposed for listing may be present in the area.

Public Interest Review: The decision whether to issue a permit will be based on an evaluation of the probable impact including cumulative impacts of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefit, which reasonably may be expected to accrue from the proposal, must be balanced against its reasonably foreseeable detriments. All factors, which may be relevant to the proposal will be considered including the cumulative effects thereof; among

those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, flood plain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership and in general, the needs and welfare of the people.

Consideration of Public Comments: The US Army Corps of Engineers is soliciting comments from the public; federal, state, and local agencies and officials; Native American Tribes; and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the US Army Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

Application of Section 404(b)(1) Guidelines: The proposed activity involves the discharge of dredged or fill material into the waters of the United States. The Savannah District's evaluation of the impact of the activity on the public interest will include application of the guidelines promulgated by the Administrator, Environmental Protection Agency, under the authority of Section 404(b) of the Clean Water Act.

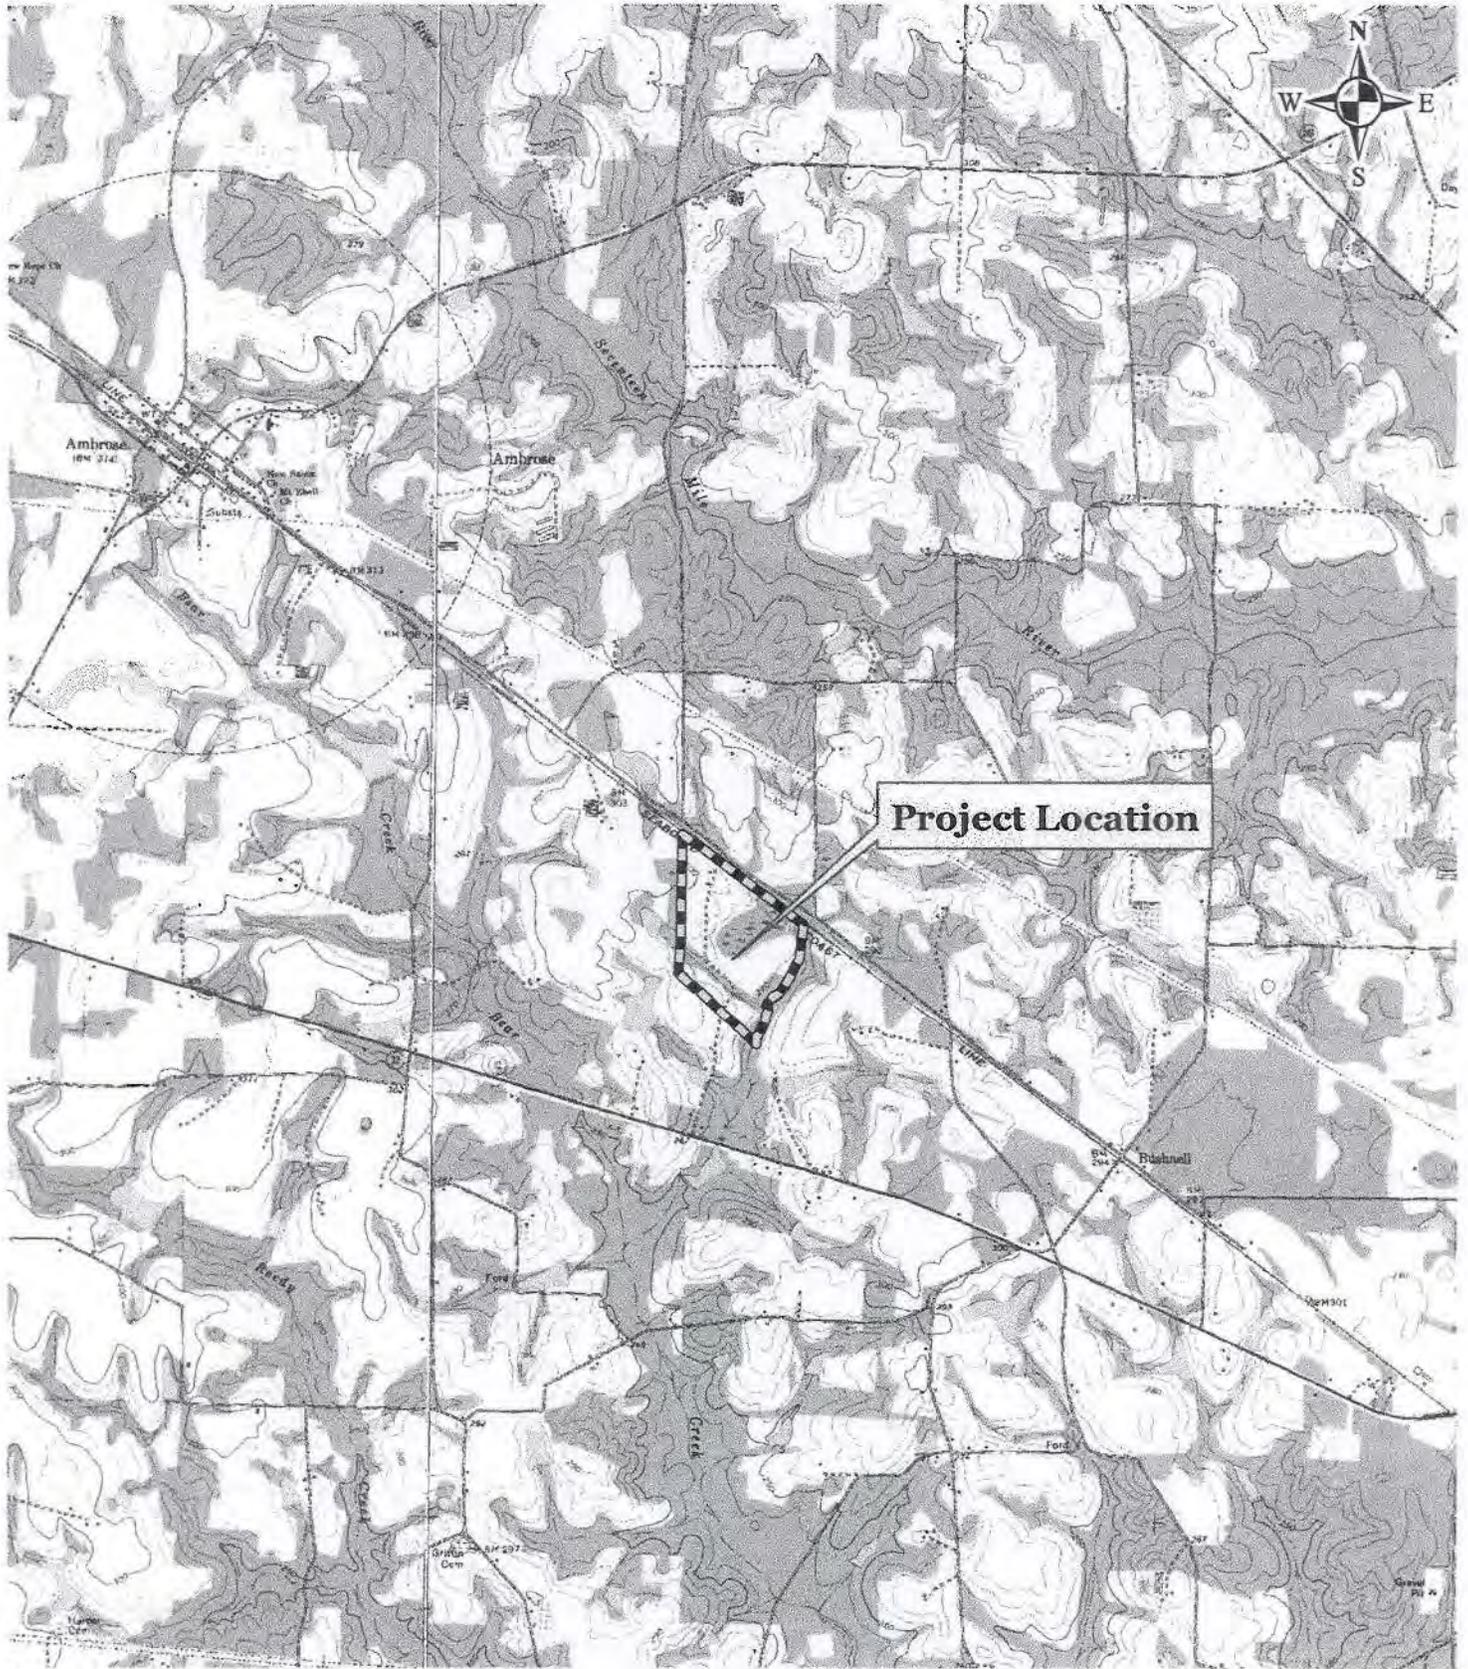

Public Hearing: Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider this application for a Department of the Army Permit. Requests for public hearings shall state, with particularity, the reasons for requesting a public hearing. The decision whether to hold a public hearing is at the discretion of the District Engineer, or his designated appointee, based on the need for additional substantial information necessary in evaluating the proposed project.

Comment Period: Anyone wishing to comment on this application for a Department of the Army Permit should submit comments in writing to the Commander, US Army Corps of Engineers, Savannah District, Attention: Terry C. Kobs, 1104 North Westover Boulevard, Unit 9 Albany, Georgia 31707, no later than 30 days from the date of this notice. Please refer to the applicant's name and the application number in your comments.

If you have any further questions concerning this matter, please contact Terry C. Kobs, Regulatory Specialist, Coastal Branch at 229-430-8567.
