

## Hartwell Lake

### Boat Ramp Bottom Elevation - Revised February 2012

**Notice:** The information on this page may contain errors. Use this information as an approximation only. Launching ability will also depend on type of vehicle, boat and trailer. In addition, ramps with siltation buildup or damage may be unusable much earlier. Always use caution when launching or retrieving a boat, especially when lake levels are lower than normal. The full pool elevation of Hartwell Lake is 660 feet above mean sea level (ft-msl). The elevations below are listed in ft-msl. Some ramps may be closed due to seasonal closures or low water closures; go to [www.sas.usace.army.mil/lakes/hartwell.boating](http://www.sas.usace.army.mil/lakes/hartwell.boating) for the boat ramp closure list. References to “left lane” and “right lane” are if you are standing on land, facing the water.
