

**US Army Corps
of Engineers**
Savannah District

ATTENTION ALL VESSEL AND PERSONAL WATERCRAFT USERS: This map has been designed to assist you in determining where boats and other watercraft are restricted around designated swimming areas. Each beach has two “Boats Keep Out” buoys located about 100 feet from the swimming area buoy lines. The buoys are spaced approximately 200 feet apart. The diagram above is a typical beach scenario on J. Strom Thurmond Lake. Starting from each buoy, take a line of sight (---) from the buoy to the shoreline and from buoy to buoy. All water inside this area (shaded) is a designated Boats Keep Out zone. This means no boats or personal watercraft are allowed in or around the swimming area or on the beach. This area will be patrolled and rules strictly enforced by Corps of Engineers Park Rangers and Georgia and South Carolina Officers from the Department of Natural Resources. We appreciate your cooperation in improving public safety on J. Strom Thurmond Lake.
