Camp Croft FUDS Update

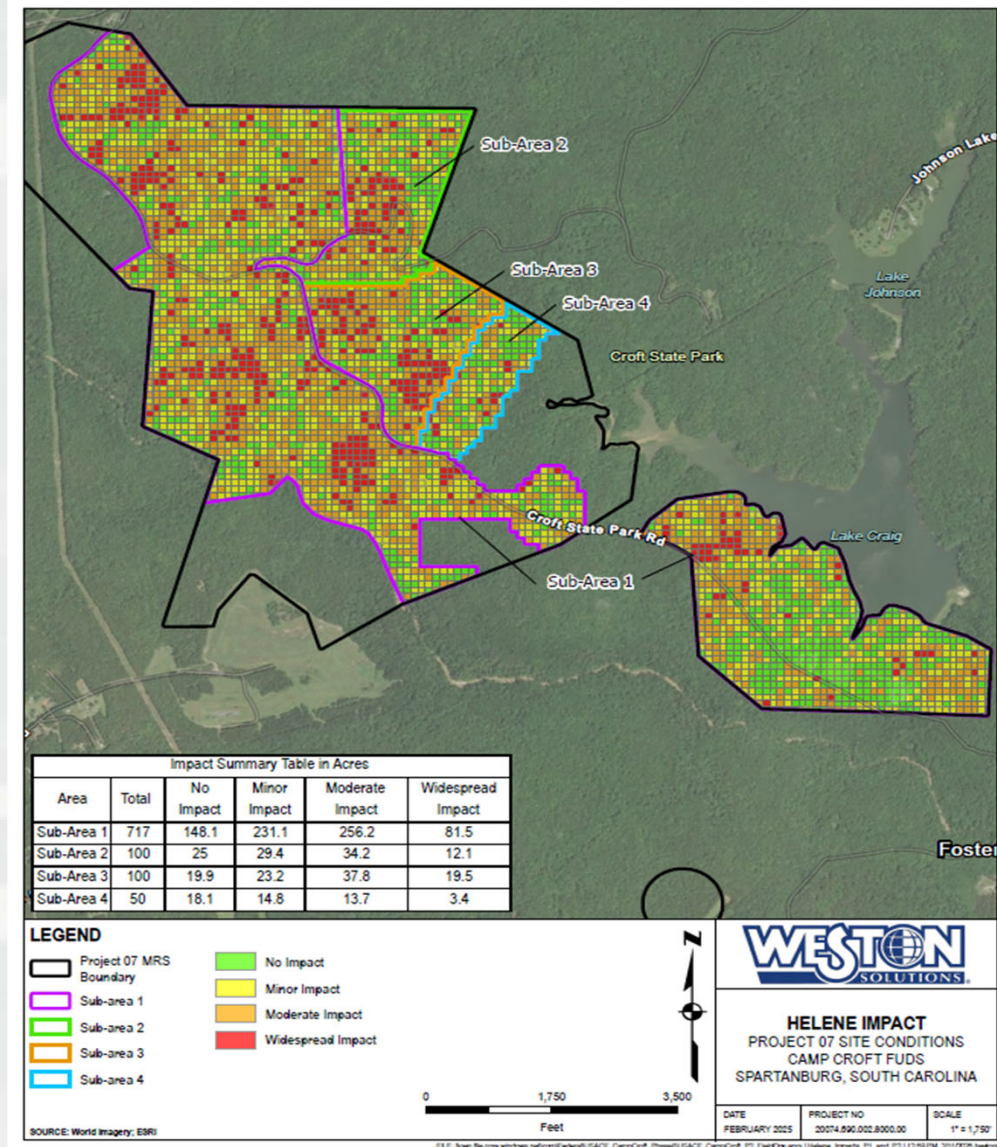

BUILDING STRONG

Project 07- Hurricane Helene:

In late September 2024, Hurricane Helene impacted Project 07, resulting in downed trees throughout Croft State Park. In response, Weston performed both ground-based and aerial site reconnaissance surveys in October and November 2024.

Results divided into 4 main categories:

1. **No Impact** – Effort to complete work in these grids is unchanged. No newly fallen trees present.
2. **Minor Impact** – Effort to complete work in these grids is relatively unchanged. 1 or 2 newly fallen, smaller trees may be present.
3. **Moderate Impact** – Effort to complete work in these grids is changed. Approximately 3 to 7 newly fallen trees (~5 trees per grid; 20 trees per acre, on average) present.
4. **Widespread Impact** – Effort to complete work in these grids is changed. 8 or more newly fallen trees (~12 trees per grid; 48 trees per acre, on average) present.

FYR Report Conclusion & Recommendations:

- ▶ Perform annual maintenance and repair of warning signs.
- ▶ Review, update, and distribute brochures, annually, provide future press releases and public notices for educational material availability.
- ▶ Place the site-specific fact sheet on the project website, consider periodic open houses to promote awareness of MEC at the former Camp Croft.
- ▶ Contact property owners that expressed specific concerns in FYR interviews.
- ▶ Coordination with Spartanburg County to provide the current remedy status of each project and provide educational materials with building and land disturbance permits to ensure future protectiveness.
- ▶ Overall Conclusion: The remedy is currently protective of human health and the environment for Projects 03 & 05.
