

Savannah District – Corps of Engineers

Regulatory Branch

Courtesy List of Georgia Environmental Consultants

The following list of environmental consulting firms is presented as a courtesy to help the general public find professional assistance in matters related to: the Clean Water Act; Rivers and Harbors Act; and the Marine, Research, and Sanctuaries Act. These matters may include wetland delineations, endangered species surveys and the preparation of permit applications to the Corps for projects occurring within the State of Georgia.

This list is not all-inclusive and this list contains only firms who have requested listing. This office is willing to work with any and all qualified environmental consultants. It is the responsibility of the consulting firms to update this office with changes to their contact information. This list is provided as a service to the public and this list will be updated as workload allows

This list is organized first by State in which the firm is located, then by City/Town of the consultants' office and/or mailing address, followed by name of the consulting firm in alphabetical order. The location of the office does not necessarily indicate the geographical area in Georgia where the consultant works. The consultant should be contacted directly to determine the geographical area the consultant works, what type of work the consultant specializes in and the costs associated with the consultant's services, etc.

Please be aware that inclusion on this list should not be considered an endorsement by U.S. Army Corps of Engineers of any listed consultant or firm. No recommendation or guarantee of competence or experience is implied by this listing. The Corps of Engineers neither endorses nor accepts responsibility for work performed by any firm on this list. We suggest that prospective clients ask for credentials before contracting for professional services.

The Corps is the final authority with respect to the delineation of waters of the US, as well as determination of activities requiring permits from the Corps. All wetland delineations must be conducted in accordance with the current method required by the Corps.

If you would like to add, remove, or modify your contact information, please contact us with your company information in the format shown below.
