**B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND:** The site is mostly developed. There is a small area that is not developed that has a drainage feature.

After reviewing the feature during a site visit, the feature was determined to be non-jurisdictional. A few of the reason why are it did not have strongly defined bed and bank, it had non-hydric soils, plants growing in the middle and it only scored a 6.0 on the NC Stream Identification Form.

<sup>1</sup>This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.
