B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND:

The project area is a private residence but was once ditched to help develop a pecan tree farm. Said project area is determined to be upland, as no portion of the site exhibits the three wetland parameters (hydrophytic vegetation, wetland hydrology, and hydric soils), nor are there any features present that exhibit ordinary high water mark. As there are no aquatic resources present on the site, this precludes the presence of waters of the United States.

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.
