B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: Based on the review of aerial photography, soil maps, NWI maps and historical mining data it has been determined that the open water pits shown on the 2010 aerial are upland dug mine pits associated with earlier mining activities. Therefore, these features would not be considered a waters of the U.S.

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.
