**B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND:** Site visit was conducted on February 21, 2020. The lot and datapoint location were reviewed and it was determined that there are no aquatic resources and thus no waters of the U.S. located within the project boundary. No portions of the review area exhibited all three wetland parameters nor was there any evidence of a tributary with an ordinary high water mark present.

<sup>1</sup> This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.
