Excluded waters $((b)(1) - (b)(12))^4$:

¹ Map(s)/Figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where independent upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD form.

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps Districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

III. SUPPORTING INFORMATION

Α.	Select/enter all resources that were used to aid in this determination and attach data/maps to this
	document and/or references/citations in the administrative record, as appropriate.

x__ Information submitted by, or on behalf of, the applicant/consultant: *Title(s)* and date(s). This information (is/is not/is and is not) sufficient for purposes of this AJD.

Rationale: N/A or describe rationale for insufficiency (including partial insufficiency).

Data sheets prepared by the Corps: Title(s) and/or date(s).

____ Photographs: (NA, aerial, other, aerial and other) Title(s) and/or date(s).

x__ Corps Site visit(s) conducted on: 19 JUN 2020.

Previous Jurisdictional Determinations (AJDs or PJDs): ORM Number(s) and date(s).

x ___ Antecedent Precipitation Tool: <u>provide detailed discussion in Section III.B.</u>

x__ USDA NRCS Soil Survey: Web Soil Survey generated for the review area: Goldsboro loamy sand, Norfolk loamy sand, and Vaucluse loamy sand

x___ USFWS NWI maps: NWI map shows a riverine feature and potential wetland approximately 500 feet to the East of the review area. No NWI features are within the review area.

x__ USGS topographic maps: NAD 1983 2011 StatePlane Georgia West FIPS 1002 Ft US. Topo map depicts a blue line tributary approximately 600 feet East, and 100 feet lower in elevation from the review area.

Other data sources used to aid in this determination:

the data could be dead to the in the determination.			
Data Source (select)	Name and/or date and other relevant information		
USGS Sources	N/A.		
USDA Sources	N/A.		
NOAA Sources	N/A.		
USACE Sources	N/A.		
State/Local/Tribal Sources	N/A.		
Other Sources	N/A.		

- **B.** Typical year assessment(s): At the time of field verification, the site is wetter than normal, per Antecedent Precipitation Calculator. Therefore, regardless of the climatic conditions exceeding the 70% probability for the 30-day rolling average of recorded precipitation during the growing season for this location, no waters of the US are present within the review area.
- **C.** Additional comments to support AJD: Site visit conducted on 19 June 2020. Site consists of a portion of an existing driveway and extends into a farm field. The proposed tower pad area is located at the edge of the farm field and a wooded area. All areas are upland, no aquatic resources within the 0.45-acre review area.

¹ Map(s)/Figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where independent upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD form.

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps Districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
