**II. FINDINGS**

**A. Summary:** Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A or describe rationale.
- There are “navigable waters of the United States” within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- There are “waters of the United States” within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).

<sup>1</sup> Map(s)/figure(s) are attached to the AJD provided to the requestor.

<sup>2</sup> If the navigable water is not subject to the ebb and flow of the tide or included on the District’s list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

<sup>3</sup> A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

**D. Excluded Waters or Features**

Excluded waters ((b)(1) – (b)(12)): <sup>4</sup>			
Exclusion Name	Exclusion Size	Exclusion <sup>5</sup>	Rationale for Exclusion Determination
Area A	1.361 acre(s)	(b)(1) Non-adjacent wetland.	Area A is not adjacent to any (a)(1)-(a)(3) waters. Area A does not abut any (a)(1)-(a)(3) waters, is not inundated by any (a)(1)-(a)(3) waters in a typical year and is physically separated from all (a)(1)-(a)(3) waters.
Area B	1.720 acre(s)	(b)(1) Non-adjacent wetland.	Area B is not adjacent to any (a)(1)-(a)(3) waters. Area A does not abut any (a)(1)-(a)(3) waters, is not inundated by any (a)(1)-(a)(3) waters in a typical year and is physically separated from all (a)(1)-(a)(3) waters.

<sup>4</sup> Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.  
<sup>5</sup> Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

Version 1.0, which used rainfall data from the Savannah International Airport weather station, we have determined the delineation was conducted during the wet season (WebWIMP H2O Balance) and that "Normal" rainfall conditions were present for the nearest weather station on the date of the wetland delineation.

- C. Additional comments to support AJD:** Area A is a depressional feature bordered to the north by an existing road, the east by a maintained uplands associated with a powerline easement, the south by forested wetlands, and the east by a residential development. Area B is a depressional feature bordered to the north by an existing road, the east by undeveloped forested and grassed lot, the south by forested wetland, and the east by undeveloped uplands.

Both Wetlands A and B have no inflow or outflow structures. No surface connections were observed other than the ephemeral and upland dug ditches that extend off the property. These features only exhibit flow in direct response to precipitation and unstained leaf litter was noted in the bottom of the ditches. These wetlands are approximately 0.52 miles from the Little Ogeechee River (TNW).
