**B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND:** Upland strata densely covers the project area. The Project area is determined to be "disturbed" from adjacent development resulting in being inundated with fill dirt/material in or around the 2003 period. The site shows no wetland and or hydrology identifiers to delineate wetland boundaries confidently.

<sup>1</sup> This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.
