B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: The site is comprised of undeveloped upland, transmission line infrastructure, paved/unpaved roadways, and upland dug ditches. Two ditches onsite. Both Ditches were dug in uplands. Historical aerials dating back to 1971 does not show evidence of waters and that the entire area within the review area is and has been upland. Ditches A and B were excavated wholly in and draining only uplands that do not carry relatively permanent flow.

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.
