DEPARTMENT OF THE ARMY
REGIONAL GENERAL PERMIT 84
Construction, Maintenance and Modification of
Recreational Dock Facilities and Associated Structures in
Non-Tidal Navigable Waters of the United States
Within the State of Georgia

SUBJECT: Regional Permit No. 84

Effective Date: December 2, 2014

Expiration Date: December 2, 2019

REGIONAL PERMIT 84 (RP 84): On the recommendation of the Chief of Engineers authority is hereby given for the construction of recreational dock facilities and associated water-based structures in the non-tidal, navigable waters of the United States, within the State of Georgia, that are subject to the jurisdiction of the U.S. Army Corps of Engineers (Corps), pursuant to Section 10 of the Rivers and Harbors Act (RHA) of 1899 (33 U.S.C. 403)

DESCRIPTION OF WORK AND ACTIVITIES AUTHORIZED BY RP 84: The construction, modification and maintenance of non-commercial, recreational, single-family, multi-family, community, and public, floating and/or pile-supported dock facilities; and associated floating and/or pile-supported, water-based structures. Associated water-based structures include, but are not limited to walkways, fixed decks, connecting ramps, boat hoists, boathouses, jet-ski floats, screened dock houses, mooring buoys, mooring pilings and dolphins.

LOCATIONS WHERE WORK AND ACTIVITIES ARE AUTHORIZED BY RP 84: Work and activities are authorized in certain sections of the following rivers and their navigable tributaries: Altamaha River; Chattahoochee River; Conasauga River; Coosa River; Flint River; Ocmulgee River; Ochlocknee River; Oconee River; Ogeechee River; Ohoopsee River; Satilla River; Savannah River; Suwannee River; Toccoa River; and Tallapoosa River. The map attached at Appendix A depicts the major river systems in Georgia that are subject to Corps jurisdiction under Section 10 of the RHA, and where RP 84 may be applicable. A list of all navigable waters in Georgia that are subject to Corps' jurisdiction under Section 10 of the RHA is attached at Appendix B.

LOCATIONS WHERE WORK AND ACITIVITIES ARE NOT AUTHORIZED BY RP 84:

1. Tidal Waters. Activities are not authorized by RP 84 in tidal waters in the coastal Georgia, including the following sections of major coastal rivers: on the Savannah River from the Atlantic Ocean, inland to Ebenezer Landing; on the Ogeechee River from Ossabaw Sound, inland to Morgan's Bridge; on the Canoochee River from its confluence with the Ogeechee River, to the mouth of Savage Creek; on the Altamaha River from Altamaha Sound, inland to Fort Barrington; on the Satilla River from St. Andrew Sound, inland to Big Oak and Limerock; and on the St. Marys River from the Atlantic Ocean, inland to Trader Hill and Highway 301. The map attached at Appendix C depicts the portions of the above listed rivers where the use of RP 84 is not authorized. Programmatic General Permit 83 (PGP 83) authorizes certain recreational dock facilities in these areas and other tidal waters of the U.S.

2. Georgia Power Lakes. Activities are not authorized by RP 84 in the following lakes that are operated by the Georgia Power Company: Goat Rock Lake; Lake Harding; Lansdale; Morgan Falls; North Highland; Lake Oliver; Riverview; and Lake Worth. Programmatic General Permit 69 (PGP 69) authorizes certain recreational dock facilities in these lakes.

3. Lake Blackshear. Activities are not authorized by RP 84 in Lake Blackshear, which is operated by the Crisp County Power Commission. Programmatic General Permit 58 (PGP 58) authorizes certain recreational dock facilities in this lake.

4. U.S. Army Corps of Engineers' Lakes:

A. Activities are not authorized by RP 84 in the following Mobile District Corps lakes: Allatoona Lake; Carters Lake; George W. Andrews Lake; Lake Sidney Lanier; Water F. Georgia Lake; and West Point Lake. In these lakes, activities are authorized by the Rules and Regulations Governing Public use of Corps of Engineers Water Resources Development Projects (Title 36), and by Regional Permits (RPs) 40, 41, 42, 43, 44, 45, 46, 74, 49, 52, 56, 57, 59, 60, 61, and 62.

B. Activities are not authorized by RP 84 in Lake Seminole, a Mobile District Corps lake. In this lake activities are authorized by Title 36 and by RPs 27, 28, 29, 30 and 31.

C. Activities are not authorized by RP 84 in the following Savannah District Corps lakes: Hartwell Lake; Lake Russell; and Thurmond Lake. In these lakes activities are authorized by Title 36 and by RPs 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, and 12.

GENERAL CONDITIONS:

1. For the purpose of RP 84, the Applicant is any agent, individual, or government who submits a written request to the Corps for use of the RP, at least 45 days prior to the planned construction start date for a proposed recreational dock facility.

2. For the purpose of RP 84, the Permittee is any Applicant who receives written verification from the Corps that a proposed recreational dock facility, and associated structure(s), if applicable, is authorized by the RP.
3. Facilities that are not specified in RP 84 or which exceed the limitations of the RP would require prior authorization under a Department of the Army Individual Permit, Letter of Permission or General Permit. The District Commander may also require submission of an Individual Permit application if he determines that authorization under RP 84 for a specific project needs individual public review. Additional permit information is available at <http://www.sas.usace.army.mil/Missions/Regulatory.aspx>.
4. All activities identified and authorized herein shall be consistent with the terms and conditions of RP 84. Activities not specifically identified and authorized herein shall constitute a violation of the terms and conditions of the RP which may result in the modification, suspension, or revocation of RP 84, in whole or in part, as set forth more specifically in the following General Conditions 5 and 6, and in the institution of such legal proceedings as the United States Government may consider appropriate, whether or not the RP has been previously modified, suspended, or revoked in whole or in part.
5. RP 84 may be summarily suspended, in whole or in part, upon a finding by the District Commander that immediate suspension of the activity authorized herein would be in the general public interest. Such suspension shall be effective upon receipt by a Permittee of a written notice thereof which shall indicate: (a) the extent of the suspension; (b) the reasons for this action; and (c) any corrective or preventative measures to be taken by a Permittee which are deemed necessary by the District Commander to abate imminent hazards to the general public interest. A Permittee shall take immediate action to comply with the provisions of this notice. Within 10 days following receipt of this notice of suspension the Permittee may request a hearing in order to present information relevant to a decision as to whether his permit should be reinstated, modified, or revoked. If a hearing is requested, it shall be conducted pursuant to procedures prescribed by the Chief of Engineers. After completion of the hearing, or within a reasonable time after issuance of the suspension notice to the Permittee, if no hearing is requested, the permit will either be reinstated, modified or revoked.
6. RP 84, or an individual activity authorized under RP 84, may be either modified, suspended, or revoked, in whole or in part, pursuant to the procedures under 33 CFR 325.7. In issuing authorizations under RP 84, the Government has relied on the information and data which the Permittee has provided in connection with his permit application. If, subsequent to the issuance of a project-specific authorization under RP 84, such information and data prove to have been false, incomplete, or inaccurate, the authorization may be modified, suspended, or revoked, in whole or in part, and/or the Government may, in addition, institute appropriate legal proceedings.
7. Any modification, suspension, or revocation of RP 84 shall not be the basis for any claim for damages against the United States.

8. The Permittee understands and agrees that, if future operations by the United States require the removal, relocation, or other alteration, of the structure or work herein authorized, or if, in the opinion of the Secretary of the Army or his authorized representative, said structure or work shall cause unreasonable obstruction to the free navigation of the navigable waters, the Permittee will be required, upon due notice from the Corps, to remove, relocate, or alter the structural work or obstructions caused thereby, without expense to the United States. No claim shall be made against the United States on account of any such removal or alteration.

9. The Permittee, upon receipt of a notice of revocation of this permit or upon its expiration before completion of the work will, without expense to the United States and in such time and manner as the Secretary of the Army or his authorized representative may direct, restore the affected water of the United States to its former condition.

10. The Permittee shall make every reasonable effort to prosecute the work authorized herein in a manner so as to minimize any adverse impact of the work on fish, wildlife, and natural environmental values.

11. RP 84 does not convey any property rights, either in real estate or material, or any exclusive privileges; and that they do not authorize any injury to property or invasion of rights or any infringement of Federal, State, or local laws or regulations.

12. RP 84 does not obviate the requirement for the Permittee to obtain State or local assent required by law for any activity authorized by the RP.

13. RP 84 does not authorize the interference with any existing or proposed Federal project and the Permittee shall not be entitled to compensation for damage or injury to the structures or works authorized herein which may be caused by or results from existing or future operations undertaken by the United States in the public interest.

14. If a Permittee desires to abandon a facility authorized by RP 84, unless such abandonment involves a Permittee transferring interests to a third party, the Permittee must restore the area to a condition satisfactory to the District Commander.

15. The Permittee must maintain all dock facilities authorized by RP 84 in good condition and in conformance with the terms and conditions of the RP. The Permittee is not relieved of this requirement if the structure or work is abandoned. Transfer in fee simple of a RP 84 authorized dock facility automatically transfers RP 84 authorization to the new property owner; with all of the rights and responsibilities enumerated herein. The Permittee shall inform any subsequent property owner of all activities undertaken under the authority of RP 84 and provide the subsequent owner with a copy of the terms and conditions the RP.

16. The Permittee will allow the District Commander or his representative to inspect the authorized facility at any time deemed necessary to assure that work is being performed or the facility maintained in accordance with Special and General Conditions of RP 84.

17. The facilities authorized by RP 84 must not interfere with the public's right to free navigation on all navigable waters of the U.S. No attempt will be made by the Permittee to prevent the full and free use by the public of all navigable waters at or adjacent to the authorized facility for a reason other than safety.

18. In issuing RP 84, the Federal Government does not assume liability for: damages to the permitted facility or uses thereof as a result of other permitted or unpermitted activities or from natural causes; damages to the permitted facility or uses thereof as a result of current or future activities undertaken by or on behalf of the United States in the public interest; damages to persons, property, or to other permitted or unpermitted activities or structures caused by the facility authorized by RP 84; design or construction deficiencies associated with a permitted facility; and/or damage claims associated with any future modification, suspension, or revocation of RP 84.

19. At any time during processing of an application for a proposed dock facility, the District Commander may determine that RP 84 will not be applicable to the specific proposal. In such a case, the procedures for processing an Individual Permit in accordance with 33 CFR 325 will be available.

SPECIAL CONDITIONS:

1. No work shall be performed under authority of RP 84 until after an Applicant submits a complete Department of the Army Individual Permit application to the Corps and the Permittee receives written verification from the Corps that the facility is authorized in accordance with the terms and conditions of the RP. A fillable application form (CESAS Form 19), instructions for completing the form and an example of a completed form are available at <http://www.sas.usace.army.mil/Missions/Regulatory.aspx>. At a minimum, an application must include the following information: vicinity map; site location map, project description; plans and drawings; and "Adjacent Property Owner Notification" forms (Appendix D) that have been completed and signed by the property owners located upstream and downstream of the project site.

2. The Applicant shall submit a complete RP 84 application package to the appropriate Corps' office for processing. The map at Appendix E depicts the Georgia counties that are served by each of the three Corps' offices that process RP 84 applications. Applications should be mailed to the appropriate Corps' office listed below:

U.S. Army Corps of Engineers
Attention: Regulatory Division
100 West Oglethorpe Avenue
Savannah, Georgia 31401

US Army Corps of Engineers
Attention: Albany Field Office
1104 North Westover Blvd., Unit 9
Albany, Georgia 31707

US Army Corps of Engineers
Attention: Piedmont Branch
1590 Adamson Parkway, Suite 200
Morrow, Georgia 30260

2. Facilities proposed at sites located adjacent to federally authorized waterways or projects will be reviewed by the Corps on a case-by-case basis. Project specific setbacks from federal projects will be determined by the Corps, if necessary, and will be included in the Corps' written verification of use of RP 84, issued to a Permittee.

3. RP 84 **does not** authorize:

A. The construction across or into any natural or manmade channel, or water body in any manner that may adversely affect navigation by the general public in navigable waters of the United States.

B. The installation of fueling facilities.

C. The construction of commercial structures or facilities.

D. Habitable structures.

E. Structures that do not have a water-related use.

F. The discharge of dredged or fill material into waters of the United States, including the discharge of uncured concrete. (NOTE: The RP does not authorize any impacts to wetlands or other waters of the U.S. for the construction of walkways leading to the river/stream bank where the dock walkway begins. The discharge of fill material or installation of pile supports for such walkways would require separate authorization.)

G. Any facility that the Corps determines would adversely affect:

(1) Rivers named in Section 3 of the Wild and Scenic Rivers Act (15 U.S.C. 1273), those proposed for inclusion as provided by Sections 4 and 5 of the Act and wild, scenic and recreational rivers established by state and local entities.

(2) Historic, cultural or archeological sites listed in or eligible for inclusion in the National Register of Historic Places as defined in the National Historic Preservation Act of 1966 and its codified regulations, the National Historic Preservation Amendment Acts of 1980 and 1992, the Abandoned Shipwreck Act of 1987 and the Native American Graves Protection and Repatriation Act.

(3) Sites included in or determined eligible for listing in the National Registry of Natural Landmarks.

(4) A National Wildlife Refuge.

4. Restrictions and limitations for the construction of private recreational dock facilities: (NOTE: On a case-by-case basis the Corps may authorize, in writing, exceptions to the following restrictions/ limitations, based on site-specific conditions or other factors.)

A. Structures may be extended or located up to 400 feet waterward of the Ordinary High Water Mark (OHWM) elevation contour or one-third (1/3) the width of a natural water body, whichever is closer to the shoreline, except as otherwise governed by the presence of a federally maintained channel.

B. The width of walkways shall not exceed six (6) feet.

C. Boathouses, boat shelters and boatlifts shall not exceed 400 square feet.

D. Fixed docks, floating docks, boathouses, boatlifts and boat shelters shall not be constructed over wetlands.

E. Walkways that extend over wetlands shall be elevated sufficiently (minimum of 3 feet from the bottom stringer to the water bottom) to prevent total shading of vegetation.

F. No dock facility shall be enclosed with wood, glass, fiberglass, metal, or any other solid type materials; however, screening of dock facilities is authorized.

5. Restrictions and limitations for the construction of proposed public recreational dock facilities will be determined by the Corps on a case-by-case basis. Factors that will be considered by the Corps with regard to the waterward extent, size, and other aspects of proposed public facilities may include, but are not limited to: the need and purpose of the facility; the site-specific conditions at the proposed project location; public safety; handicapped access; and navigation.

6. Floating structures will installed to provide for fluctuations of water elevation, designed so that the structure will not rest on the water bottom at any time and secured in such a manner as to not break away. Floating structures will be supported by materials that will not become waterlogged or sink when punctured (i.e., not over 1-1/2 percent by volume American Society for Testing and Materials standards). Metal covered or injected drum flotation is not allowed. Foam-bead flotation is authorized if it is not subject to deterioration through loss of beads, meets the above standard, and has a minimum density of 1.2 pounds/cubic foot, is authorized. Foam bead flotation with a density less than of 1.2 lb/cu ft is authorized, provided it is encased in a protective coating that meets the above standard.

7. It is possible that the authorized structure may be damaged by wave-wash from passing vessels. The Permittee shall take proper steps to ensure the integrity of the permitted structure and the safety of moored boats. The Permittee will not hold the United States liable for any such damage.

8. RP 84 does not authorize any facility that will adversely affect any threatened or endangered species or a species proposed for such designation, or their designated critical habitat as identified under the Federal Endangered Species Act (ESA) (16 U.S.C. 1531). The U.S. Fish and Wildlife Service "Initial Project Scoping (IPaC)" printout identifying federally-listed threatened and endangered species that may occur in the vicinity of the project site, is available at <http://ecos.fws.gov/ipac/>. Applicants shall notify the Corps if any listed species or designated critical habitat might be affected by the proposed dock facility, and for such a proposal, may not begin work until notified by the Corps that the requirements of the ESA have been satisfied. Applicants are advised that for a project proposed in a county where there is an IPaC listed "Clam" species and/or critical habitat for a "Clam" species, a survey may be required for listed bivalves (mussels) at the project site and the area downstream of the project site.

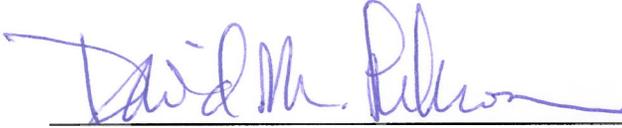

9. If, during the execution of the work authorized by RP 84, the permittee encounters a previously unidentified cultural resource that might be considered eligible for inclusion in the National Register of Historic Places (NRHP); the permittee shall cease work and immediately notify the Corps. Upon notification by the permittee of the identification of a potentially eligible cultural resource within the vicinity of a RP 84 authorized dock facility, the Corps will conduct a preliminary review to determine if the resource would warrant further investigation. If, based on the Corps' preliminary review the resource appears to be eligible for inclusion in the NRHP, the Corps will initiate consultation with the Georgia Department of Natural Resources, Historic Preservation Division (Georgia HPD), pursuant to Section 7 of the National Historic Preservation Act. Based on the outcome of the Corps' review and consultation with Georgia HPD, measures deemed necessary to mitigate impacts to cultural resources would be incorporated as special conditions into the authorization issued under authority of RP 84. The permittee would then be notified of the addition of such special permit conditions, if applicable.

10. Permittees are advised that development activities in or near a floodway may be subject to the National Flood Insurance Program that prohibits any development, including fill, within a floodway that results in any increase in base flood elevations. RP 84 does not authorize activities prohibited by the National Flood Insurance Program.

11. The Permittee must install and maintain, at his expense, any signal lights and signals prescribed by the U.S. Coast Guard, through regulations or otherwise, on authorized facilities. For further information, the Permittee should contact the U.S. Coast Guard at (305) 415-6730.

RP 84 becomes effective when the Federal official designated to act for the Secretary of the Army has signed below.

**ADJACENT PROPERTY OWNER NOTIFICATION
NOTICE OF INTENT TO CONSTRUCT A DOCK FACILITY**

This notification is to advise you that _____
has submitted an application for a permit to construct a dock facility on a site that is adjacent to your property. The U.S. Army Corps of Engineers requires that you, as an adjacent property owner to the proposed dock facility, be notified. The applicant has been instructed to provide you with a copy of the description, maps, plans and drawings for the proposed dock facility, along with this notification form.

As an adjacent property owner (upstream or downstream - circle one) to the project site where the proposed dock facility would be constructed, I have reviewed the project description, maps, plans and drawings provided to me by the applicant, and:

_____ **Do not object** to the dock facility, as proposed.

_____ **Object** to the dock facility, as proposed, for the following reason(s):

Name _____

Address _____

Phone # _____

Adjacent Property Owner Signature

Date
