U.S. Army Corps of Engineers: Preparation of Supplement for Brunswick Harbor Navigation Project

BRUNSWICK, Ga. -- This Public Notice is intended to disseminate information about the preparatory step and general path forward regarding the U.S. Army Corps of Engineers, Savannah District's, plans to supplement its National Environmental Policy Act and other environmental compliance documentation for Operation and Maintenance of the Brunswick Harbor Navigation Project via an Environmental Impact Statement.

The supplementation is expected to focus largely on the environmental effects of maintenance dredging using hopper dredges.

To help the Corps of Engineers initially assess the appropriate effort and documentation, it will begin coordination with resource agencies.

After the Corps of Engineers has considered information from its initial communications and identified the planned supplementation, a NEPA scoping effort will follow.

The Corps of Engineers will request public comment on its planned supplementation of environmental compliance.

This Public Notice is not precedential and will not become a component of the Corps of Engineers' procedure.

Questions or comments can be submitted electronically to cesas-planning@usace.army.mil.

ABOUT US: The U.S. Army Corps of Engineers Savannah District plays a major role in water resource projects throughout the region. The District operates three hydroelectric dam and reservoir projects on the Savannah River (Hartwell, Richard B. Russell, and J. Strom Thurmond); maintains the federal shipping channels at the Savannah and Brunswick harbors; and processes Regulatory (stream/wetland) permits for development projects within the state of Georgia. The District also oversees a multi-million dollar military construction program at 11 Army and Air Force installations in Georgia and North Carolina. The District provides expertise across a wide range of disciplines--from engineering, architecture and design to construction, master planning and environmental services. **Learn more at www.sas.usace.army.mil or use your smart phone camera on the QR code to visit our social media sites at:**
