The Port of Savannah has been one of our greatest economic assets and it must be deepened to 48 feet to continue to compete. I support the SHEP to allow larger and deeper draft ships to call on the Port of Savannah. It is critical to the economic prosperity of our state and the future transportation infrastructure needs of our nation. Comment on the fingineers of Engineers welcomes your comments on the Savannah Harbor Expansion Project. Once completed, place the card in the "comments" box or add postage and mail it back to us. Comments can also be provided online at CESAS-PD@usace.army.mil.

comments: The port of Savannah supports hundred of thousands of jobs not only in 6A, but throughout the U.S. and thus generates killioms in personal income, and tax receipts annually. And for this version, the Savannah Howbor deepening initiative is critical to help boost Georgia's as well as the not tion's economic recovery war after year. We must keep up with the demands of global transportation by accommo dating the arger ships that will soon tall on Savannah and the rest of the US ports.

I also see the deepening initiative as an important component of our national security. We must mentain the US's climinant position in facilitating global transportation by ensuring US control over these important services; ports feal by making them economically viable and attrative to customers. GPA: The State of Georgea are also environmentally services to the passible consequences of the harbor deepening by porting discounting to maintain our national resources.
