Comments:	Very critical to the US Economy that this
	project by the GPA / Corps be completed
	ASKP. It will mean a very strong boost the
	SE sector of the US. Without it Service
	will be in very por condition.
	,

Comments: I am in full support of deepening the channel to the 48 foot
Maximum. Our participation in the global economy is vital to our aconomic
growth. This properties in turn with our nutrous growth. The apportunition
I for efficiency and Job growth provided by this project will have
a lasting impact on both the regional and nutronal economy.
I noted that world class container terminals are of immense
Stretagic importance for an aconomic competitioness.
Strange inferiore to an advisor conferences.

Comments: O support despening the Savannah River to 48 pt. It is a great economic engine for the region servicing areas as for west as Chrisgo II There is an abundance of land I labor with your support growth Whis is is especially true if companions are made to gents in the northeast. Ship traffic is essently constrained by waiting for the tide. The watt is a costly endeavor.

comments: As my employment is directly linked to GPA my future and security are directly linked to the continued success that GPA has in attracting the major skipping Lines from around, the Worldard the major impureers to exporters to use Savannah as the entry or exit port on the East Coast. Shipping Lines are very demanding and competition is strong between the East Coast Ports, the Lines use their competition to their advantage and less significant things than river depth can influence the Line to go to another fort if possible.

The river depth is a constant topic of conversation between GPH and the Lines - they are moving toward larger tharger ships frying to reduce their costs, If Savannah does not move forward with this deppinging we may very well loose, Georgia as a whole will loose, significant revenue—it will shift probably to charleston, but possibly Jacksonville or Mamic. The "Studies" have been done, large amounts of dollars spent and GPA is an environment steward—it is time to move forward—DREDGE

Comments: I Strangy Support SHEP, The Swannesh horton provides comme
for all of the South East US. The to the coment depth, we also
see a negative impact on the flow of carso that Negatively
impacts all US consumers and producers. We must
proceed with the expansion project ASAP in order to continue
to support our water borne traffice.

SAVANNAH AIRPORT COMMISSION

December 16, 2010

CHAIRMAN Sylvester C. Formey Mr. William Bailey Attn: PD, US Army Corps of Engineers Savannah District

100 West Oglethorpe Avenue Savannah, GA 31401-3640

VICE-CHAIRMAN Stephen S. Green

Dear Mr. Bailey:

COMMISSIONERS Shirley B. James Sheldon Tenenbaum Lois C. Wooten On behalf of the Board of Directors of the Savannah Economic Development Authority, the Savannah Airport Commission would like to express its strong support for the deepening of the Savannah harbor. The Port of Savannah has been one of our greatest economic assets since the founding of Georgia and, in order to remain so, it must be deepened to 48' to continue to compete globally.

LEGAL COUNSEL James B. Blackburn This project is also important to the future transportation infrastructure needs of our nation.

Sincerely,

EXECUTIVE DIRECTOR Patrick S. Graham, A.A.E.

Patrick S. Graham Executive Director

ASSISTANT EXECUTIVE DIRECTOR Gregory B. Kelly, A.A.E.

"History...Community...Commerce...Effingham Chamber...Cultivating Success!"

Mr. William Bailey

Attn: PD, US Army corps of Engineers, Savannah District

100 West Oglethorpe Avenue

Savannah, GA 31401-3640

Dear Mr. Bailey:

The Effingham County Chamber of Commerce would like to go on record as being fully in favor of the proposed deepening of the Savannah Harbor. Even though Effingham County is north of Savannah and the harbor area, the work of the Georgia Ports there has a great impact on the surrounding counties and cities. The state of Georgia has few economic 'engines' of this magnitude and we support this effort to not only maintain our current business at the ports, but to make a move that will enable these facilities to keep pace with innovations in the shipping industry, and thus, enabling us to maintain and even attract new business for the state and region.

Sincerely,

Randy Shearouse, President

December 15th, 2010

Dear Mr. Baily,

I am writing in support of the Savannah Harbor Expansion Project. This is a very significant project not only for Savannah and the state of Georgia, but also our nation. As the fourth largest port in the nation Savannah must be ready to accommodate the massive Post Panamax ships that will soon be calling on ports all over the world.

The SHEP will assist the nation in successfully meeting the National Export Initiative created by Executive Order of President Obama:

In order to meet the NEI aimed at doubling US exports over the next five years, the port infrastructure must be in place to accommodate the export growth.

The Port of Savannah handled 12% of all US containerized exports in FY2010, a total 1.14 million export TEU's (twent-foot equivalent units), with an export ration of 54%.

SHEP – one of the most important and productive civil works projects in the country – will maintain and create jobs and commerce throughout the nation, while significantly reducing transportation costs for U.S. shippers.

Thank you

Donna Piper

Tybee Island, GA

December 16, 2010

Mr. William Bailey US Army Corps of Engineers, Savannah District ATTN: PD 100 West Oglethorpe Avenue Savannah, Georgia 31401-3640

Dear Mr. Bailey,

On behalf of the Shippers Warehouse, I (Bill Stankiewicz) am writing you today to express our full support of the Savannah Harbor Expansion Project (SHEP). This project is critical to the continued growth of metro Atlanta, Georgia and the Southeast Region. International trade and the movement of goods are essential to our economic prosperity. Supply Chain and logistics creates more than 132,000 jobs in metro Atlanta's economy alone. Increasing the capacity of Savannah's Port will enable increased trade throughout the region, promote future growth, and create jobs for Georgia.

As you know, the Port of Savannah has been the fastest growing container port in the country over the past decade and its continued success is critical to economic recovery in Georgia and throughout the Southeast. The Savannah River Navigation Channel must now be deepened from 42 feet to as deep as 48 feet to accommodate the new generation of deep-draft vessels that will dominate trade when the expanded Panama Canal opens in 2014. The efficiency gained by these larger ships will lower transportation costs of U. S. exports and will solidify Georgia's role as a national leader in international commerce and could shift as much as 25% of ocean trade flows from west to east coast. In Georgia alone, our ports support more than 286,000 jobs, contribute some \$14.9 billion in income, \$3.5 billion in federal taxes, and \$2.8 billion in state and local taxes each year. Most importantly, over \$6 Billion worth of goods were shipped through Georgia's ports to counties within the Metropolitan Atlanta area. With SHEP, that will continue to grow. Alternatively, without SHEP, we will face the loss of many of our existing jobs over time.

We believe the Savannah Harbor Expansion Project (SHEP) will provide a highly cost-effective return on investment to Atlanta and the nation. This expansion represents a once-in-a-generation opportunity to significantly enhance Georgia's economic prosperity. Based on the importance and the potential long range impact of this project for metro Atlanta, Georgia and the Southeast's economy, we fully support this project.

Sincerely

Bill Stankiewicz Vice President/General Manager

Re: Savannah Harbor Expansion Project (SHEP)

Letter of Support

Dear Mr. Bailey:

On behalf of Pattillo Industrial Real Estate, I wish to express my support of the **Savannah Harbor Expansion Project (SHEP)**. This project is essential to the growth of international commerce. It will create jobs and raise economic prosperity throughout Georgia and the Southeast United States.

The success of the SHEP is critical to economic recovery. The expansion of the Panama Canal creates new opportunity which we can only capture by investing in this infrastructural enhancement project. You have my full support of this project.

Sincerely,

Lawrence P. Callahan Chief Executive Officer

I support the deepening of the Savannah Harbor. The port in Savannah has become a vital part of the Georgia economy. It is also vital to the surrounding states of South Carolina, Florida, Tennessee and Alabama who all benefit from the vitality of the port in Savannah. This deepening is a key aspect of the ongoing success of the port and the continued recovery or our economy.

Thank you for your consideration.

Gary Sanchez.

TO: The US Army Corps of Engineers

SUBJECT: Savannah Harbor Expansion Project Comments

The purpose of this comment is to wholeheartedly support the dredging of the Savannah River to 48' to accommodate the larger draft post-Panamax container ships, which will be coming through the expanded Panama Canal starting in 2014.

As background, I have lived in Savannah for the past 26 years – all of them in the real estate business. During that time, I have had the privilege of working on some of the largest real estate developments in the entire region through my work with Branigar/Union Camp and Crescent Resources/Duke Energy. In my roles with those companies, I was given the opportunity to play a key role in the development of The Landings on Skidaway Island and be the driving force behind Godley Station near the airport, the Buckwalter Tract in Bluffton, the Schultz Tract in Bluffton (now Bluffton Park), Palmetto Bluff, the Argent Tract, the Hardeeville Tract, and a residential project called Oldfield. So, I believe I can speak with some credibility on the Greater Savannah/Bluffton/Hilton Head/Hardeeville region.

To that end, I have watched in amazement as two forces re-shaped Savannah – the Savannah College of Art & Design (SCAD) and the Port.

SCAD saved downtown - end of story.

The Port has driven an industrial/warehouse/distribution boom unique in almost the entire country. This has in turn has supported outstanding residential and commercial development – turning a once sleepy Savannah into one of the most desirable places in the country to both live, work, play, and retire.

Not granting the Port the permit to dredge the river effectively stops this growth. The old mantra is if you are not growing, you are dying. This will be especially true for Savannah. With not enough depth to handle the newer and larger container ships coming through the canal and calling on the East Coast, Savannah's loss will be other East Coast port's gain. This business cannot and will not be replaced – and will mark the end of the growth story in Savannah and the start of a decline and all the negatives that brings. Take a look at Detroit for a glimpse into a no-permit future.

For perhaps the best understanding of the role the Port plays in this region, let me share a call I received from a client in Chicago last week. This extremely successful entrepreneur called me to say he wished to make a substantial real estate investment in Savannah. When I inquired as to the reason why, he stated that he believed that if Savannah was successful in getting the river deepened, it would outperform any other area on the East Coast, and he wanted to be sure he was in on that. He then asked about the status of the permit.

So, after the most-studied issue in the already long history of Savannah – you guys have done one hell of a job on that -- let's stop the analysis, reviews, commenting, etc. and get on with the real work and real benefit of dredging the river to 48' – NOTHING could be better for the entire region.

Thanks so much for providing the opportunity to comment.

Mr. Bailey,

I am writing in response to your e-mail regarding the deepening of the Savannah Harbor. My company, Southeast Industrial Equipment, is a provider of Forklift Trucks and other material handling equipment to The Georgia Ports Authority. In addition, we supply equipment to many of the Stevedore companies and a majority of the Third-Party Logistics companies that are supported by the shipping industry through the ports of Savannah.

I don't have to tell you that competing with the Ports of Charleston and Jacksonville has been hard for The Georgia Ports Authority. I feel that deepening the harbor will allow the GPA to continue to attract new customers that will provide business opportunities in our area. Over the last 5 years, the port of Savannah has become home to new businesses such as Target, IKEA and Heineken USA just to name a few. Deepening the Savannah Harbor will allow the GPA to continue with a progressive approach to the global logistics pipeline and will help to keep Savannah at the forefront of the global shipping industry. The growth of the shipping industry in Savannah will, in my opinion, lead to a stimulated economy, by providing new jobs as well as both income and tax dollars to Georgia. What does this mean to Southeast Industrial Equipment? It means the potential for increased sales, and with that comes a larger market presence, a stable, secure workforce and increased profits.

I would like to thank you for providing this forum for small businesses to express their opinions and for your efforts in SHEP. I will be anxiously awaiting word on this monumental issue concerning our community, our state and our businesses.

Sincerely,

Bill Edgy

Friends & Family

We all need to support the Savannah Harbor Expansion Project (SHEP) so the National Export Initiative can be met. Imagine if the Savannah, Georgia Ports Authority was the largest container port in the country. All the statistics that the GPA generate will triple or quaruple. Included in these statistics are Jobs & Income. Much of what is needed all around the country. Savannah has an unemployment rate of 7.7%, compared the national average of 6.9%. This project bring economic developent to the state of Georgia along with major logistical needs to our nation.

Pass this along to all your friends & family so we can support the US Army Corps of Engineers, Savannah District. Please send all comments to CESAS-PD@usace.army.mil & CC/BCC your friends & family.

Respectfully,

Parrish Smith, US Army Veteran

About the SHEP.....

The Savannah Harbor Expansion Project (SHEP)

The Savannah Harbor Expansion Project is a project of national significance.

o The Port of Savannah is responsible for moving 8.3% of all US containerized cargo and more than 18% of all East Coast trade.

o As the fourth largest container port in the country, the Port of Savannah serves approximately 21,000 companies in all 50 states, over 75% of which are headquartered outside of Georgia.

o The SHEP will allow larger, deeper draft ships to call on the Port of Savannah, the import/export gateway to 44% of the US population. The economies of scale offered by Post Panamax ships will result in an average of 17% cost savings to US exporters and importers when compared to the operating costs of Panamax vessels.

The SHEP will assist the nation in successfully meeting the National Export Initiative created by Executive Order of President Obama.

o In order to meet the National Export Initiative aimed at doubling US exports over the next five years, the port infrastructure must be in place to accommodate the export growth.

o The Port of Savannah handled 12% of all U.S. containerized exports in FY2010, a total of 1.14 million export TEUs (twenty-foot equivalent units), with an export ratio of 54%.

Mr. William Bailey US Army Corps of Engineers – Savannah District 100 West Oglethorpe Avenue Savannah, GA. 31401-3640

VIA E-MAIL: (TESAS-PD@USACE.ARMY.MIL

Dear Mr. Bailey,

CSX Transportation (CSXT) is a Class 1 railroad serving the eastern United States with connecting service to Western US, Canada and Mexico. CSXT serves both domestic and international customers. We market our service as a logistics solution which offers environmental benefits and helps to reduce highway congestion.

CSXT would like to provide its support for the Savannah Harbor Expansion Project (SHEP) and encourage the USACE to approve this endeavor. As you know, the Port of Savannah is the second largest container port by volume on the East Coast serving a rapidly growing Southeast market. This region relies on the efficiency and cost effectiveness of the Port of Savannah to help meet consumer demand. CSXT moved over 100,000 containers in 2010 between the Port of Savannah and several points in the Southeast and we expect that volume to continue to grow in 2011 and beyond.

The Georgia Port Authority has made significant investments in its port, distribution and transportation infrastructure over the last 10 years to meet today's demand and tomorrow's growth. However, with the \$5.2 billion Panama Canal expansion on schedule for a 2014 completion, the Georgia Ports Authority now needs your approval for the Savannah Harbor Expansion Project so it can handle the new generation of larger vessels that are becoming predominant in the maritime industry.

It is vital that the USACE deepen the draft at the Port of Savannah for the efficient movement of goods to and from the Southeast region and to allow for continued economic growth and job creation that the Port of Savannah creates.

Thank you for your consideration,

Sincerely,

Clarina Booden

Importance: High

December 17, 2010

Mr. William Bailey US Army Corps of Engineers, Savannah District ATTN: PD 100 West Oglethorpe Avenue Savannah, GA 31401-3640

Dear Mr. Bailey,

In conjunction with the Metro Atlanta Chamber and our more than 4,000 members, I am writing you today to express our full support of the Savannah Harbor Expansion Project (SHEP). This project is critical to the continued growth of metro Atlanta, Georgia and the Southeast Region. International trade and the movement of goods are essential to our economic prosperity. Increasing the capacity of Savannah's Port will enable increased trade throughout the region, promote future growth, and create jobs for Georgia.

As you know, the Port of Savannah has been the fastest growing container port in the country over the past decade and its continued success is critical to economic recovery in Georgia and throughout the Southeast. The Savannah River Navigation Channel must now be deepened from 42 feet to as deep as 48 feet to accommodate the new generation of deep-draft vessels that will dominate trade when the expanded Panama Canal opens in 2014. The efficiency gained by these larger ships will lower transportation costs of U. S. exports and will solidify Georgia's role as a national leader in international commerce and could shift as much as 25% of ocean trade flows from west to east coast. In Georgia alone, our ports support more than 286,000 jobs, contribute some \$14.9 billion in income, \$3.5 billion in federal taxes, and \$2.8 billion in state and local taxes each year. Most importantly, over \$6 Billion worth of goods were shipped through Georgia's ports to counties within the Metropolitan Atlanta area. With SHEP, that will continue to grow. Alternatively, without SHEP, we will face the loss of many of our existing jobs over time.

We believe the Savannah Harbor Expansion Project (SHEP) will provide a highly cost-effective return on investment to Georgia and the federal government. This expansion represents a once-in-ageneration opportunity to significantly enhance Georgia's economic prosperity. Based on the importance and the potential long range impact of this project for metro Atlanta, Georgia and the Southeast's economy, we fully support this project.

The Metro Atlanta Chamber brings the best together to help Atlanta thrive. We mobilize and connect the business community to drive economic development and public policies that promote sustainable growth. Our board draws from Atlanta's top business leaders. We have a professional staff of 90 and serve 4,000 member companies who employ nearly a million workers. In Economic Development, our project managers attract the best companies and the best jobs. In Public Policy, we tackle crisis issues and critical quality-of-life challenges such as transportation, water and education. For our members, we offer 150+ events and activities each year to help them connect and make business contacts. In 2009, the Chamber celebrated 150 years of bringing Atlanta leaders together.

Sincerely, Tim Blumentritt

S.H.E.P. Project / Savannah Subject:

Monday, December 27, 2010 12:44:45 PM Date:

The Statewide Economic Impact of Georgia's Deepwater Ports (FY2009):

295,443 full and part-time jobs (7% of Georgia's total employment); \$61.7 billion in sales (9% of Georgia's total sales);

\$26.8 billion in gross state product (7% of Georgia's total GSP); \$15.5 billion in income (5% of Georgia's total personal income);

\$3.5 billion in federal taxes

\$2.6 billion in state and local taxes

I believe the numbers above should be more than sufficient impetus to make all parties strong supporters of this project, That being said, all investment in infrastructure is an investment in the future for the country as a whole, it is indeed a "Global Economy", and this project will serve to make the globe smaller, and our GDP larger. Without the ability to handle the new, larger fleet of coming "Superships", fully laden, this port will fall behind, and actually lose ground, it all comes down to economics, exporters and importers will make their decisions based on their bottom lines, not on geography, not on loyalty, and what may seem like common-sense, is often not the dollars and cents reality, if this project does not go through, it may even open the door for more manufacturers to seek an offshore / outsource option if the lack of modern export facilities cause undue financial burden to their operations. We must be efficient, and cost effective, and we must have built in equipment compatibility, deepening the Port of Savannahs' waterways will acheive this compatability.

Sincerely, Gene Henry

Date: Monday, December 27, 2010 7:36:01 PM

After reviewing the harbor deepening project initiatives and goals, I would be proud to say I fully support this project. Not only would the succession of this project benefit federal, state, and local governments, but it would also benefit each and every citizen of Georgia and other participating states in general. The cry for employment would be greatly reduced by all the opportunities this project would open up, from construction work to truck drivers and even port personnel. The nations companies and corporations would have a positive impact from the project as well, thus creating vast employment opportunities in every state. The positive outcomes in the completion of this project would surpass any negative reprocutions that would effect the environmental state of surrounding Savannah. This project would also serve as a giant step forward for our nations suffering economy, any improvement at this point is a blessing.

Sincerely, David Vance.

RE: Savannah Harbor Expansion Project

Dear Mr. Bailey:

On behalf of the board of directors of the Liberty County Development Authority (LCDA), it is my pleasure to support the Savannah Harbor Expansion Project (SHEP). The deepening of the Savannah Harbor to 48 feet is critical for the Port of Savannah to continue to compete in the global economy.

The Port of Savannah is one of our region and state's largest economic engines. Specifically, Liberty County and our existing industries greatly benefit from the Port of Savannah.

Liberty County's proximity to the Port of Savannah continues to be one of our most valuable incentives for locating companies and creating new jobs. Companies, both foreign and domestic, continue to select Liberty County, because they see the community as a place where they can grow globally due in large part to the Port of Savannah.

In Liberty County, 70% of the existing industry employment is tied to companies headquartered overseas. In addition, Liberty County's existing industries export to over 70 countries throughout the world with the majority of the exports going through the Port of Savannah.

The SHEP will help Liberty County, the state of Georgia, and the United States as we continue to recruit and retain industry. The project is imperative as we try to grow jobs.

Thank you for the opportunity to submit a support letter. Please do not hesitate to contact me if you have any questions or need any additional information.

Sincerely,

Allen Brown Chairman do com

December 21, 2010

Mr. William Bailey
US Army Corps of Engineers, Savannah District
ATTN: PD
100 West Oglethorpe Avenue
Savannah, GA 31401-3640

Dear Mr. Bailey,

On behalf of the Metro Atlanta Chamber Global Commerce Council and our more than 200 member organizations, including companies like Siemens, Crawford & Company, Delta Air Lines, Georgia Power, and Georgia-Pacific, I am writing you today to express our full support of the Savannah Harbor Expansion Project (SHEP). This project is critical to the continued growth of metro Atlanta, Georgia and the Southeast region. International trade and the movement of goods are essential to our economic prosperity. Global commerce creates more than 160,000 jobs in metro Atlanta's economy alone. Increasing the capacity of Savannah's Port will enable increased trade throughout the region, promote future growth, and create jobs for Georgia.

As you know, the Port of Savannah has been the fastest growing container port in the country over the past decade and its continued success is critical to economic recovery in Georgia and throughout the Southeast. The Savannah River Navigation Channel must now be deepened from 42 feet to as deep as 48 feet to accommodate the new generation of deep-draft vessels that will dominate trade when the expanded Panama Canal opens in 2014. The efficiency gained by these larger ships will lower transportation costs of U. S. exports and will solidify Georgia's role as a national leader in international commerce and could shift as much as 25% of ocean trade flows from west to east coast. In Georgia alone, our ports support more than 286,000 jobs, contribute some \$14.9 billion in income, \$3.5 billion in federal taxes, and \$2.8 billion in state and local taxes each year. Most importantly, over \$6 billion worth of goods were shipped through Georgia's ports to counties within the metropolitan Atlanta area. With SHEP, that will continue to grow. Alternatively, without SHEP, we will face the loss of many of our existing jobs over time.

We believe the Savannah Harbor Expansion Project (SHEP) will provide a highly cost-effective return on investment to Atlanta and the nation. This expansion represents a once-in-a-generation opportunity to significantly enhance Georgia's economic prosperity. Based on the importance and the potential long range impact of this project for metro Atlanta, Georgia and the Southeast's economy, we fully support this project.

The Metro Atlanta Chamber brings the best together to help Atlanta thrive. We mobilize and connect the business community to drive economic development and public policies that promote sustainable growth. Our board draws from Atlanta's top business leaders. SNF HOLDING COMPANY

Mr. William Bailey

ATTN: PD, U.S. Army Corps of Engineers, Savannah District

100 West Oglethorpe Highway Savannah, GA 31401-3640

Dear Mr. Bailey,

I am writing to you on behalf of SNF Holding Company in support of the Savannah Harbor Expansion Project. SNF Holding Company is based in Riceboro Georgia. We are the world's largest producer of polyacrylamide flocculants and related monomers. We are the largest industrial employer in Liberty County Georgia, with more than 1000 people, including employees and contractors, employed at our site. More than 40% of the products we make are exported, mostly through the Port of Savannah, and we also import many of our raw materials through the port.

The continued viability and competitiveness of the Savannah port is critical to our business. We compete on a global basis and our products must be competitively priced. The port expansion project is vital to maintaining this competitiveness.

In addition, SNF Holding Company has recently started construction of a new polymer manufacturing plant in Plaquemine LA. At the current time this plant is not intended to reduce employment at our Riceboro site. However, the Plaquemine plant will compete with the Riceboro plant for future investment by the company, and any reduction in the competitive advantages of the local area could have a negative effect on future employment at this site.

We believe the Savannah Harbor Expansion Project is essential to sustaining and growing our business. Please let me know if you have any questions.

Yours truly,

David J. Kaye

VP Manufacturing SNF Chemtall Inc.

GREATER MEMPHIS CHAMBER

December 21, 2010

Mr. William Bailey ATTN: PD, US Army Corps of Engineers, Savannah District 100 West Oglethorpe Avenue Savannah, GA 31401-3640

Dear Mr. Bailey:

The Greater Memphis Chamber is pleased to write this letter of support for the Savannah Harbor Expansion Project. With the assistance of the international consulting firm, IHS Global Insight, we have recently completed the Memphis Regional Freight Infrastructure Plan which identifies Savannah as a very important East Coast Gateway Port for Memphis. This harbor improvement is of great strategic importance to Memphis because major CSX and Norfolk Southern rail terminals are located at the Savannah Port. These two Class 1 railroads also have significant logistics facilities in Memphis. The CSX expanded its intermodal terminal in conjunction with the CN Railroad several years ago and the Norfolk Southern Railroad is in the process of building a new \$129 million intermodal terminal and logistics park as part of the Crescent Corridor Project.

The improved deep water harbor with direct connection between Savannah and Memphis is not only of regional but of national importance. U. S. Department of Commerce Secretary Locke was in Memphis recently espousing the benefits of the President's Export Initiative to double export within five years. Memphis is 28th among the top 368 metro areas for exporting and we believe that the linkage to Savannah will enhance exporting and benefit the balance of trade for our country.

The Savannah Harbor Expansion Project is significant because it makes time sensitive goods movement even more efficient and provides reduced time-to-market cost. Because of this unique connection between Memphis and the Port of Savannah, the Greater Memphis Chamber encourages the timely completion of the Savannah Harbor Expansion Project.

Thank you for your consideration in this matter. If you need additional information, please contact me.

Sincerely.

Dexter Muller, Sr. V. P.
